

JYOTHILAL REJI

Full Stack Developer · Data Science · Machine Learning

Kerala, India · Working with clients worldwide | jyothilalreji@gmail.com | github.com/jyothilalreji | linkedin.com/in/jyothilal-reji

SUMMARY

Computer applications graduate building complete digital products — live production platforms, realtime web and mobile applications, and data-driven systems. Experience spans one year of full-stack development and maintenance on the live platform at ot24.ae for a UAE business, a data science internship (Python, Scikit-learn, Power BI), and solo product development with React, TypeScript, Supabase and Capacitor.

SKILLS

Languages	Python, SQL, JavaScript, TypeScript, PHP
Web & Mobile	React, HTML, CSS, Django, Tailwind CSS, Supabase, Capacitor, Flutter (basic)
Data / ML	Pandas, NumPy, Scikit-learn, TensorFlow, Keras, Random Forest, SVM, KNN, Neural Networks
Visualization	Power BI, Matplotlib, Seaborn
Tools	Git, AWS, Jupyter, Google Colab, MySQL, WAMP

EXPERIENCE

Full Stack Developer — ONTIME24 (ot24.ae), Remote · UAE

April 2025 – March 2026

- Built, deployed and maintained the live production platform at ot24.ae end-to-end for one year.
- Full-stack development across responsive frontend, business logic, data and deployment.
- Continuous production iteration — monitoring, fixes, performance tuning and feature updates.

Data Science Intern — Luminar Technolab, Kochi, Ernakulam

May 2024 – Present

- Developed and evaluated machine-learning models, improving prediction accuracy by 30%.
- Automated data preprocessing pipelines, reducing cleaning time by 15%.
- Built Power BI dashboards that improved decision-making efficiency by 20%.
- Contributed to data analysis and web application optimisation.

PROJECTS

ONTIME24 — Live production platform for a UAE business (HTML, CSS, JavaScript, React)

- Live at ot24.ae — designed, built and maintained full-stack for one year (Apr 2025 – Mar 2026).
- Continuous production iteration: performance, responsiveness and feature updates.

Quicky — Gamified social platform · solo hobby project, in development (React, TypeScript, Supabase, Capacitor)

- Realtime multiplayer platform with rooms, chat, friends, coins, gifts, themes and an admin console.
- Includes Spin the Bottle (12-player rooms) and multiplayer Ludo with server-authoritative dice.

Online Shoe Store — E-commerce, college project (Django, Python, MySQL)

- Transactional order and inventory management supporting 50+ daily transactions across 50+ products.

Doctor Appointment Booking — Web application, college project (PHP, MySQL, JavaScript)

- Online booking with doctor schedules, slot integrity enforced at the database level.

EDUCATION

Bachelor of Computer Applications (BCA) — Mar Augusthinose College, Ramapuram

June 2021 – March 2024 · CGPA 7.46 / 10

CERTIFICATIONS

- Data Science Foundations — Great Learning
- Data Visualisation With Power BI — Great Learning
